I agree to the processing of my personal data for recruitment purposes in accordance with applicable data protection regulations.

Wyrażam zgodę na przetwarzanie moich danych osobowych dla potrzeb niezbędnych do realizacji procesu rekrutacji (zgodnie z ustawą o ochronie danych osobowych).

Experienced digital professional with 10+ years in web design, front-end development, and software engineering. Successfully delivered over 200 web and design projects across tourism, e-commerce, and manufacturing sectors. Skilled in UI/UX, responsive web design, branding, and front-end implementation. Strong engineering background, analytical mindset, and self-learning ability enable efficient problem-solving and consistent delivery of results.

Experience

Gvinico LLC, Tbilisi, Georgia / Senior design engineer

Jan 2023–Jun 2025

- Contributed to the strategic growth of [Gvinico.com](https://gvinico.com)—a Shopify-based wholesale catalog of Georgian wines—as lead designer, UI/UX specialist, and front-end developer, **resulting in a 50% increase in product deliveries, onboarding of 90+ regional producers**, and an **expansion of the catalog by over 400 items**.
- Designed and customized Shopify themes, illustrations, and templates for articles, interviews, and social media: creating a comprehensive design system that positioned the catalog as the leading wine platform in Georgia in both informational depth and commercial functionality.
- Developed and programmed interactive SVG maps of Georgian wine regions—a unique solution that enables users to identify wine origins visually and significantly simplifies regional navigation.
- Developed an internal system to automate the processing of product illustrations, increasing content management efficiency tenfold.
- Created and programmed over 100 unique wine aging schemes in vectors for marketing use.
- Implemented a QR code-based system for product information retrieval in 16 languages, significantly enhancing customer accessibility and product transparency.

Key Skills: UI/UX Design · Web Design · Mobile App Design · Design Systems · Branding · Illustrations · Shopify · HTML · CSS · JavaScript · Liquid · Responsive Front-End Development · Scalable Vector Graphics (SVG) · Social Media

Marketing Agency “Promoting”, Moscow, Russia / Art Director, Head design engineer

Jan 2014–Feb 2022

- Led the development of a full cycle of digital products: websites, e-commerce platforms, and mobile applications—from information architecture and UX research to visual design and front-end implementation. More than 80 projects were implemented with my participation, which **enabled the agency to reach the Top100** in the Moscow region.
- Developed from scratch a complete digital presence for “GuteWetter” gutewetter.com, a large manufacturing company, including website concept, UI/UX, frontend, and mobile app design system, with an integrated product configurator that **increased sales by 30%** in the first year.
- Designed and developed the full brand and digital platform for “Mechanization” mechanization.ru, a catalog of construction equipment, including logo, UI/UX, responsive web design, and front-end. The solution was included in **the Top10 industry catalogs** in the Moscow region upon its launch.
- Designed UI/UX and interaction logic for e-commerce platforms, including Alati alati.ru, Kubele kubele.com, and others—interface behavior, forms, and responsive layouts, social media templates. These improvements led to a 10–30% increase in product sales across platforms.
- Acted as art director, UI/UX, and layout designer for the travel portal Tursvodka tursvodka.ru—developed the platform from concept to front-end implementation, including branding, social media assets, and print materials. Upon launch, **the portal entered the Top 10 regional tourism platforms**.
- Led the redesign and responsive adaptation of the website for MBA Business School mba.su, **the No.1 independent MBA expert** in Russia—developed a new logo and complete set of digital branding assets.
- Collaborated on promotional web projects for international brands Sodexo and Collin's, helping establish their presence in the regional market through tailored design and web implementation.

Key Skills: UI/UX Design · Web Design · Mobile App Design · Design Systems · Branding and Identity · Illustrations · HTML · CSS · JavaScript · Responsive Front-End Development · Web Animation · Social Media · Project Management · Wireframing · Poligraphy and Printing preparation

Oil refinery plant “Naftan”, Novopolotsk, Belarus / Head of IT department, Lead software engineer

Dec 2008–Dec 2013

- Established and managed the IT department within the Directorate for Construction, Repair, and Reconstruction.
- Designed digital strategy and visual assets to strengthen the online presence of one of the largest oil refineries.
- Led and contributed to the development and implementation of 40+ automated workstations and software solutions supporting logistics, construction, repair workflows, and product accounting (from order processing to pricing).
